

## Simple solution for warehouse complexity

**Our web-based Warehouse Management System (WMS) enables you to control and manage your warehouse easily and conveniently with its user-friendly interface. It offers powerful functionalities designed to fulfill the specific requirements of storing aviation-related material.**

### Quick implementation and easy handling

As a web-based stand-alone solution, web.control can be implemented easily and cost-efficiently with no need for adaptations in the system infrastructure. The clear structure and the self-explanatory interface enable simple handling and comfortable data upload and download. Since the data is hosted in a cloud, it can be accessed easily by every Internet-capable device anywhere around the world – a simple log-in with your user data ensures real-time insights in your warehouse stocks any time you need them

### Modern flexible structure with modular features

The system offers all the functionalities required from a smart WMS for the aviation industry:

- Performance and management of inbound and outbound warehouse processes
- Creation of all documents automatically by the system
- Real-time overview of current stock
- Performance and system tracking of inventories
- Definition of target stock levels of specific goods with automated system alerts
- Tables can be ordered or expanded to accommodate additional data (e.g. special storage requirements, life-limited parts, DGR)
- Import of your existing data and warehouse structure
- Excel export for further analysis

The system has a modular design and can be customized to meet your individual requirements.

### Customer service support

If you have questions or need additional support, our web.control support team is always happy to assist you. Several support levels are available to meet all your requirements.

### Customer advantages

- Web-based solution – your warehouse data can be accessed by every Internet-capable device
- Quick implementation
- Simple and comfortable management of material and warehouse
- Clear structure and self-explanatory use
- Modular design for system customization
